TalentLoop

Job Posting & Application Platform

Description

TalentLoop is a web-based platform designed to streamline the job search and application process. The site allows users to find jobs, post job opportunities, learn more about the platform through the About section, and contact the administrators via the contact page

Team Members & Responsibilities

Asmaa Mahmoud	About & Contact Pages
Basant Adel	Candidates & Post a Job Pages - Make a Header Component.
Lobna AbdElRahman	Home Page - Make a Navbar and Footer Component
Saja Mohee	Blog & Want a Job Pages

Key Features

01

Home

Provides an introduction and highlights the key features of the platform.

02

About

Share information about the platform’s purpose.

03

Candidates

Allows users to create and manage their candidate profiles.

04

Contact Us

Provides a form for users to contact the platform's support or admin team.

05

Want a Job

Users can browse and search for job opportunities.

06

Post a Job

Employers can post job listings and reach out to potential candidates.

Technologies Used

01

Framework

AngularJS

02

UI Library

Bootstrap
for responsive

03

Animations

Animate.css
for adding CSS
animations to the
header

04

Version Control

Git & GitHub

05

Icons

FontAwesome
for using scalable
vector icons

Challenges and Solutions

Achieving a consistent design across different screen sizes was challenging, but using media queries helped resolve this.

Future Improvements

- Add user authentication for employers and candidates.
- Allow candidates to apply for jobs directly on the platform.
- Implement backend integration to store job listings and candidate profiles.

Conclusion

TalentLoop is a user-friendly platform developed using Angular, which simplifies both the job search and job posting processes. The project highlights a strong understanding of front-end development, focusing on Angular, responsive design using Bootstrap, and seamless animations with Animate.css. Additionally, Font Awesome icons are integrated to enhance the UI and provide intuitive navigation.
